Subject: Taki Too

Sir,

Here in the info I hope you were asking for on the Taki Too. I will get the rest for you in a couple of hours.

Sir,

It just so happens we have logs that go back 5 years (1825 days). The number of times the bar was restricted during those days equals 1422 times. Keeping in mind that the e-mail asks if we restricted it more than one time during any given day. There are many days we will restrict the bar two or three times depending on the tide, weather, Moon. you name it. I would also like to point out that these numbers do not reflect the number of times the bar was restricted to all traffic, this reflects a restriction of any kind. Again the e-mail was not specific in what it was asking. At no time could we find that we had requested to restrict to commercial vessels.
