Arrived at rfr Kition for 0545. At 0705 began to follow Pilot's orders. At 0740 heard Peggy H. ask Pilot to let his line go. Then I felt the ship shake. I could not see the Peggy H. from where I was at. At 0750 we stopped churning on the starboard stern and headed to the bow of the ship. As the pilot requested. Then we proceed to put the ship into the Mele anchorage.

We followed all of the Pilot's orders. There were no mechanical failures or crew part.
