**Subject:** RE: Empress grounding master's license status

Brian,

We have finalized our enforcement against the master. We entered into an agreement for him and suspended his license for 5 months, he has to take a leadership course and write an article for hopeful publication. The suspension started last week.

The EMPRESS will be doing their final run in SEAK in early August. They are running half empty cruises and losing money. The company is trying to sell her. A shame after all the effort put into improving the SMS onboard.
