The use of GIS in marine accident investigation
Who are the MAIB?

We are a UK government organisation which is responsible for examining and investigating all types of marine accidents to or on board UK ships worldwide, and other ships in UK territorial waters.

We do not apportion blame.
Sources of Positional Data
The Tools we Use
Issues we face

• VDR not functioning as expected
• AIS out of range
• Data missing
Our use of MADAS and ArcGIS
Clipper Point Case Study
