

# National Transportation Safety Board

## Event Data Recorders

Jane Foster

# Overview

- Recommendations history
- Heavy vehicle event data recorders
- Engine control modules (ECMs)

# Recommendations History

- Other modes of transportation require crash event recording
- 1999 and 2010 bus recommendations concerning event data recorders
- Status remains “Open—Unacceptable Response”

# Heavy Vehicle Event Data Recorders

- Dedicated, crash-protected recorders on heavy vehicles
- Similar to recorders in other modes of commercial transportation

# Engine Control Module (ECM)

- Primary functions
  - Fuel delivery, engine performance
  - Communicate with other electronic systems
  - Diagnostic fault codes
- Secondary functions
  - Data recording, but not dedicated event data recorder
  - No expectation of data survivability

# Crash ECMs

Chattanooga

2008 Thomas Built school bus

Cummins ECM

# Crash ECMs

Baltimore  
2005 New Flyer transit bus  
Cummins ECM

# Crash ECMs

Baltimore  
2015 IC school bus  
IC ECM

**No event data recording function**

# Summary

- NTSB has long advocated for event data recorders
- Without dedicated event data recorders, critical data remain unavailable
- Data would improve commercial vehicle safety

# National Transportation Safety Board
